FOREST SERVICE

SEP 20 1920  
Spend Your Vacation in the  
National Forests

**T**HE freedom of the forest and an ideal place for recreation in the open—a place where you may feel at home and enjoy yourself in your own way—are some of the things besides timber that the Forest Service endeavors to provide on the National Forests.

Camping is free and generally requires no permit. You may choose your own camp ground and help yourself to dead wood for fuel and to forage for your camp

stock. You may fish or you may hunt with gun or camera. On most of the Forests there are no restrictions on these sports other than those imposed by the game laws of the States in which the Forests are situated. You can find out what these are from Forest officers, or State game wardens.

*Be careful with fire.*—See that your camp fire does not set fire to the woods. Make sure it is all out, every spark, before leaving it. Keep your camp site clean and sanitary.

For the erection of summer homes, hotels, resorts, and other structures for recreational purposes individuals or associations may secure special permits. These are usually granted for an indefinite period, but where the permittee expects to make a considerable expenditure for improvements he may be given a permit for a term of not more than 30 years. It has been found that in most cases the indefinite special-use permit is entirely satisfactory to the permittee. Not more than 5 acres may be allowed to any single person or association. On a few of the smaller Forests no permits for private summer homes are granted because of the limited amount of Government land available, and because there are private lands nearby which may be leased or purchased for their use.

The Forest Service wishes to accommodate as many people as is practicable. For this reason tracts desirable for summer-home purposes, except in unusual instances, are limited to one acre or less in area, and term permits run for a period of from 5 to 15 years (with privilege of renewal). Undue crowding between permittees is avoided and provision is made for those who especially seek isolation and privacy. The annual rental charge for lands occupied for summer homes varies from \$5 to \$25, depending on the location. Where permits are issued for as low a rate as \$5 per year the privilege is given for an indefinite period.

A personal examination of the land to be occupied should be made before an application is filed. The application must be in writing and must specify the location of the area desired, the use to be made of it—that is, whether for private summer home, hotel, or resort—and the estimated cost of the intended improvements. This application should be filed with the nearest forest officer.

Detailed information respecting any particular locality or Forest may be secured by addressing the Forest Supervisors or the District Foresters.

The addresses of District Foresters and headquarters of Supervisors are given on pages 1 to 8.
